

LESSLIE NEWBIGIN

Aspiring Cybersecurity Analyst | Ethical Hacking & Network Security

lessliehkr1@gmail.com | Portfolio: lesslie-newbigin.github.io | Coimbatore, Tamil Nadu, India

PROFESSIONAL SUMMARY

Incoming Cybersecurity engineering student (B.E. Cybersecurity, CMS College of Engineering and Technology, Coimbatore) with hands-on exposure to penetration testing tools, network security fundamentals, and hackathon-driven security system design. Holder of Fortinet NSE 3 and COFPS (Certified Online Fraud Prevention Specialist) certifications, with additional training from UNITAR and HP. Experienced in applying tools such as Kali Linux, Nmap, Wireshark, and Burp Suite to explore vulnerability identification and system security concepts. Seeking to apply foundational technical skills and a strong learning drive in an entry-level cybersecurity, IT security, or SOC-support role.

TECHNICAL SKILLS

Security Tools: Kali Linux, Nmap, Wireshark, Burp Suite

Networking: TCP/IP, DNS, HTTP, Wireless Network Security (WPA2/WPA3)

Operating Systems: Linux, Windows

Security Domains: Penetration Testing Fundamentals, Ethical Hacking Concepts, Vulnerability Assessment, Digital Forensics Concepts, Fraud Prevention, Cyber Risk Awareness

Core Frameworks: NIST Cybersecurity Framework (Identify, Protect, Detect, Respond, Recover)

Soft Skills: Team Leadership, Project Coordination, Public Awareness Communication, Continuous Self-Learning

EDUCATION

B.E. Cybersecurity | CMS College of Engineering and Technology, Coimbatore — Incoming

Higher Secondary (CS-Maths) | Model Higher Secondary School, Mulanur — 2026

CERTIFICATIONS

- Fortinet NSE 3 (FCA) — Fortinet
- COFPS – Certified Online Fraud Prevention Specialist
- Cybersecurity & Artificial Intelligence Workshops — UNITAR, HP (10+ certifications, including Lean Six Sigma AI Yellow Belt)
- In Progress: Certified Ethical Hacker (CEH); Amateur Radio (HAM) Restricted Grade License

PROJECTS

Smart Border Security System (SIDP Project) | Team Lead

- Designed a laser-based virtual fencing system concept to detect unauthorized border intrusion in real time
- Proposed sensor integration and automated alert mechanisms to notify authorities upon breach detection
- Led a 4+ member team across task assignment, development coordination, and progress tracking
- Applied concepts of perimeter security, surveillance systems, and intrusion detection

Tamper-Free Evidence System | Kaaval Hackathon

- Developed a concept ensuring integrity and authenticity of digital evidence using hashing and verification techniques

- Proposed secure storage methods to prevent unauthorized modification or deletion of records
- Designed for reliable chain-of-custody tracking to support law enforcement use cases

Digital Twin for Missing Person Identification | *Kaaval Hackathon*

- Designed a digital twin-based identification system matching physical and digital identity data
- Focused on improving investigation efficiency through data modeling and simulation

AI-Based Traffic Monitoring System | *Kaaval Hackathon*

- Proposed an AI-powered camera system for real-time traffic monitoring and violation detection
- Designed a computer vision workflow for vehicle tracking, signal violation, and congestion analysis

CheCore - Cybersecurity Network Analysis Tool | *In Progress* | github.io

- Building a cybersecurity-focused system for network analysis and security testing
- Experimenting with penetration testing tools and ESP32 microcontroller hardware integration
- Applying real-world attack scenario and defense mechanism concepts through hands-on implementation

VOLUNTEERING

National Cyber Crime Reporting Portal (NCRP)

- Promoted cybercrime awareness and safe online practices among the public
- Guided individuals through the cybercrime complaint reporting process

Tiruppur District Cyber Crime Wing

- Supported public safety and digital security awareness campaigns

LANGUAGES

Tamil (Native), English (Professional Working Proficiency)
